

Installation Guide

Tools You Will Need: Tools You May Need

Electric Drill

Hammer

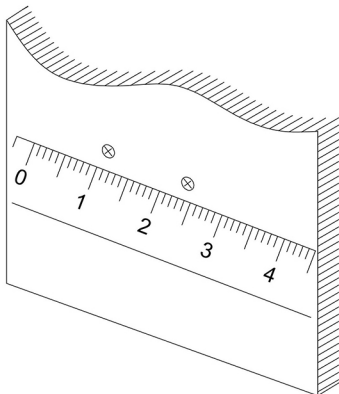

Before the Installation

1. Do not throw away packing materials until assembly is complete for small parts may come loose inside the carton during shipment. If parts are missing, please contact us.
2. Proper assembly of this item requires 2 people.
3. Periodically check to ensure that all connections are tight.
4. It is recommended that installation of the product be done by a qualified licensed furniture assembler.

Care and Cleaning

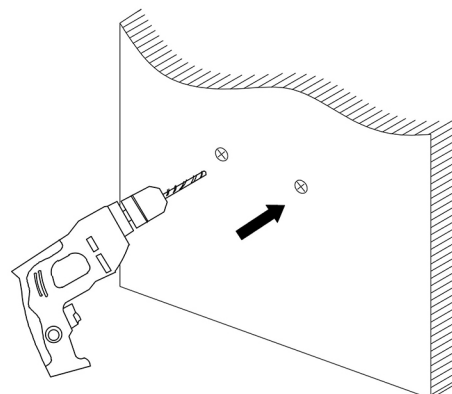

To protect the finish, avoid use chemicals and household cleaners.

Step 1

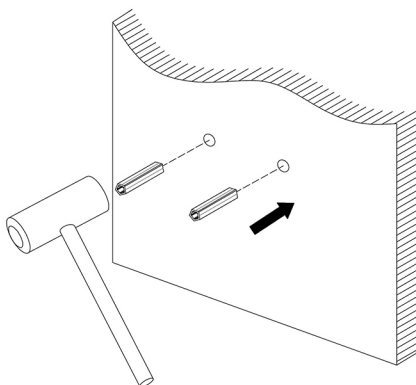

Step 1: Select the location of the wall space to be installed. Measure the distance of the product hook with a ruler, measure the same distance on the wall (if the product has only one hanging hole, you can skip this step), and mark the hole position on the wall with a pen.

Step 2

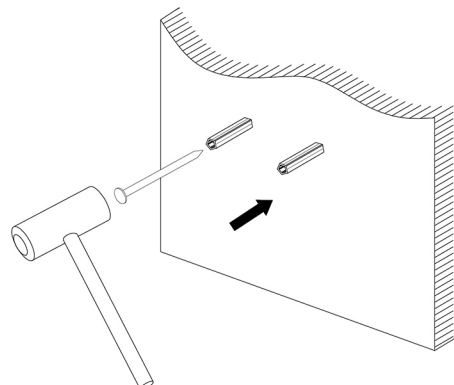

Step 2: Punch holes at the marked positions with an electric drill, the depth of which is the length of the expanded rubber cap.

Step 3

Step 3: Plug the expansion rubber cap into the hole.

Step 4

Step 4: Nail the screw into the expanded rubber cap, with the nail head reserved for 5mm, and hang the product back hook on the screw to finish.
